PROFILE

An Information Engineering student at Universitas Gadjah Mada working at the intersection of software engineering and organizational leadership. Currently Chairman of KMTETI FT UGM, leading an organization of 250+ members, and Partnerships Manager at UGM Blockchain Club, while building production web systems with Next.js, TypeScript, and PostgreSQL. Progressed from division staff to organizational lead within two years across four organizations, with hands-on experience in event operations, logistics coordination, partnership management, and people development. Open to opportunities in fullstack web development, product engineering, and technology-driven organizations.
